<b>Biography of workshop organizer/s</b> (max 100words)	<p>Was born in Tehran/Iran on 1982. He is currently an Assistant Professor of Architecture at Final International University in Faculty of Architecture. He has a MS in Architecture Program and Ph.D. in Architectural Design Theory. His specific areas of expertise are architectural design, environmental design, vernacular architecture, housing in general and IT in architecture and design, Fractal theory and geometry, cellular automation, algorithm design and building construction techniques studies in advanced. He has publications in vernacular architecture and IT in architecture studies at international levels.</p>	
<b>Brief Explanation</b> (aims and expected outcome) (max100 words)	<p>“Fractals are entities that display self-similarity in their geometry such that any portion of the system is a replica of the whole as seen at a larger scale.“          A sense of diffusion as the most significant characteristic of “HUB” terminology will be represent by the help of fractal theory as a transitional space, in HFH workshop.          Mentioned theories will be applied by designing and constructing a pavilion in the courtyard of the campus.          Self-proliferation of similar prefabricated wooden pallets is going to practice and representing the prefabrication construction systems.          Fractal pavilion is going to construct with wooden panel and there is a possibility of transferring the pavilion to the old city of Famagusta after workshop.</p>
